

April 27, 2009.

Dear Parents:

As you may already be aware the CDC (Center for Disease Control) recently reported the Swine Flu Outbreak in California. I would like to assure you that we as a school are taking the required precautions by asking students to follow adequate personal and respiratory hygiene, including but not limited to washing hands, refrain from sharing utensils or bottles and informing the office immediately if a student feels sick. I addressed the students, staff and faculty at an assembly this morning regarding the same.

I ask that you do not send your child to school if he or she shows any flu like symptoms or is not feeling well enough to be in school. All flu symptoms are not related to the Swine Flu but we have been advised to err to caution.

Enclosed is information for your reference. We are in constant contact with our local district and the diocese and will keep you posted incase of any developments. Should you have any questions or concerns please call the school office.

Sincerely,

Mrs. Arellano
